

# Press release: FLEX bizz

## New wireless headset for the mobile office

*ILD International, based in Höllviken Sweden, unveils FLEX bizz, a new Bluetooth® comfort headset for the mobile phone based office.*

”- Bluetooth headsets today are very small and slim, with a lot of focus on design and style. This is of course convenient for occasional handsfree use in the car or out of the office, but probably not the best choice for those who spend all day on the phone at the office.” says Mats Werngren, product manager at ILD International, developer of the FLEX bizz headset. FLEX bizz is a full size headset with headband wearing style and a noise cancelling microphone system, designed for all day office use.

Businesses and organizations today are rapidly replacing the traditional wired PBX systems with mobile phone based systems, or mobile extensions. There are a lot of advantages to this new technology, but a common problem is the ergonomics of the mobile phone. FLEX bizz is developed especially to provide great comfort for those who spend long hours on the mobile phone. FLEX bizz is compatible with virtually any Bluetooth enabled mobile phone.

### **FLEX bizz**

FLEX bizz has an ear capsule with acoustic shock protection and low pressure against the ear. The large speaker allows for high definition in the audio reproduction. The microphone is noise-cancelling and filters out unwanted background noise in open office environments. The latest Bluetooth chipsets (v2.1) and a high-capacity battery provides 15 hours of continuous talk time. A convenient desktop charger is included in the package.

### **About ILD International AB**

The company has developed and marketed telephone accessories for the Nordic market since 2004. Focus is on user friendly products with comfort, quality and a nice design in a competitive price range. Read more about ILD at [www.ILD.nu](http://www.ILD.nu)
